FemiHub · App user flow

How a woman moves through FemiHub on the mobile app and web (femihub.vercel.app): sign-in, health tools, Femi AI, shop and community.

User action · Automatic / web only

GETTING STARTED · SIGN-IN

App launch — first run or after sign-out

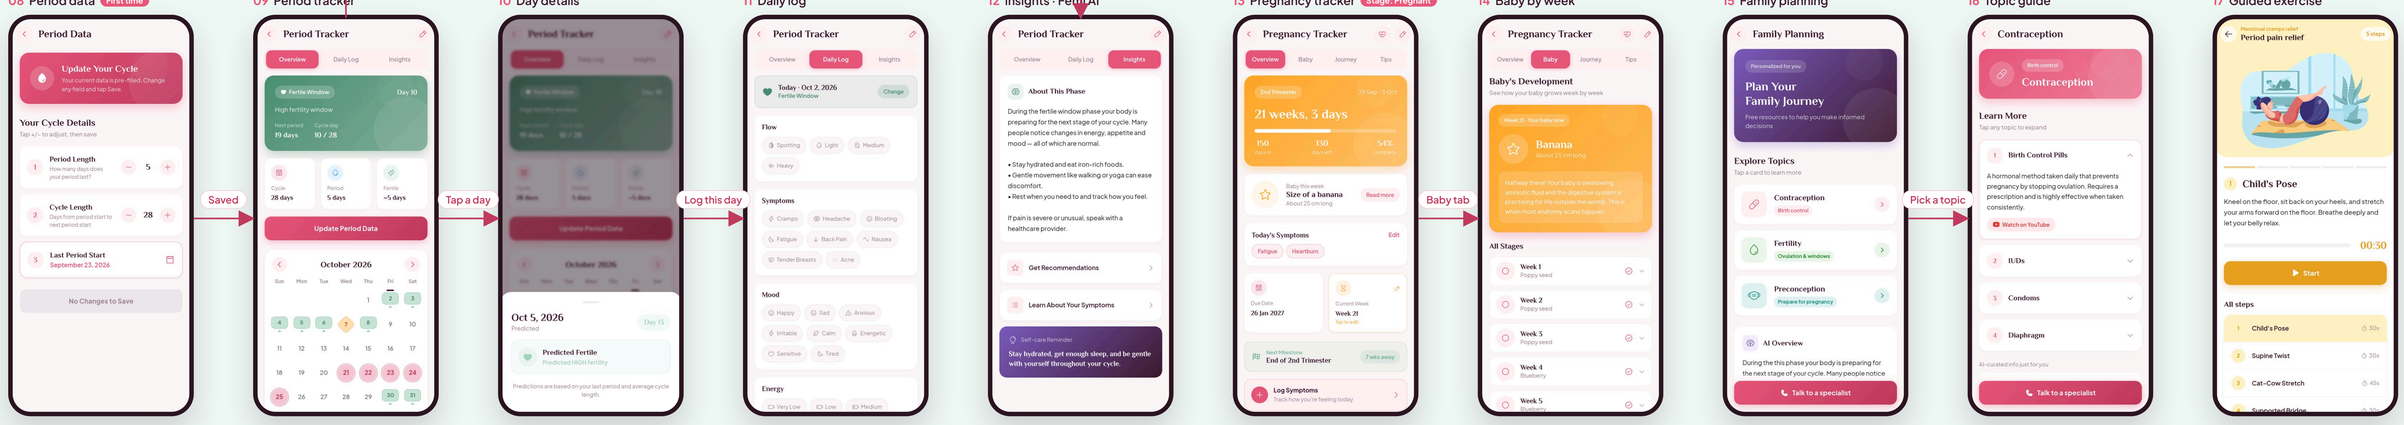

HEALTH TOOLS

From Home → Period Tracker (stage: Not Yet Pregnant / A Mother)

From Home → Pregnancy Tracker

From Home → Family Planner

From Home → exercise card

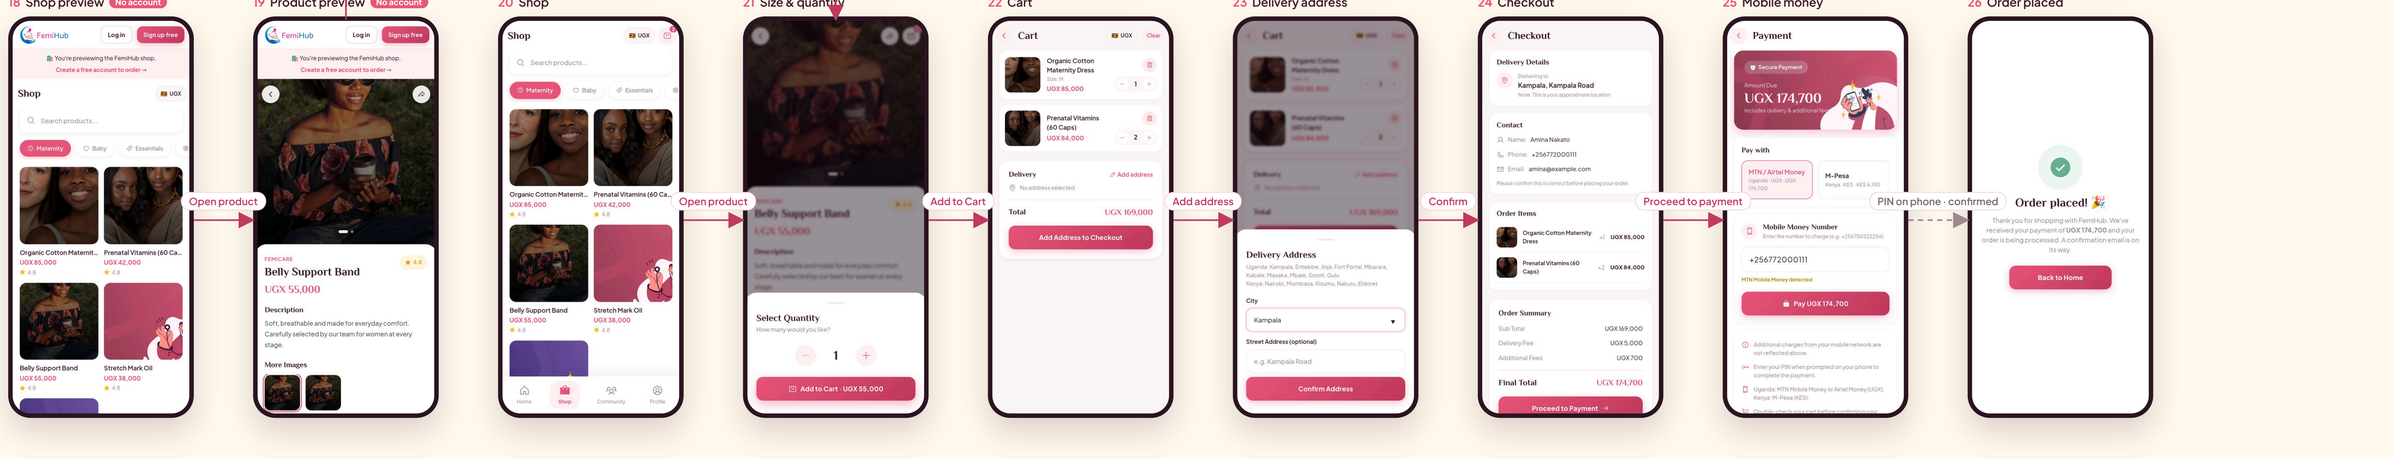

SHOP · VISITORS AND MEMBERS

Visitors · before sign-up

Signed in · Shop tab or Home → Trending

Add to Cart → sign up, item kept

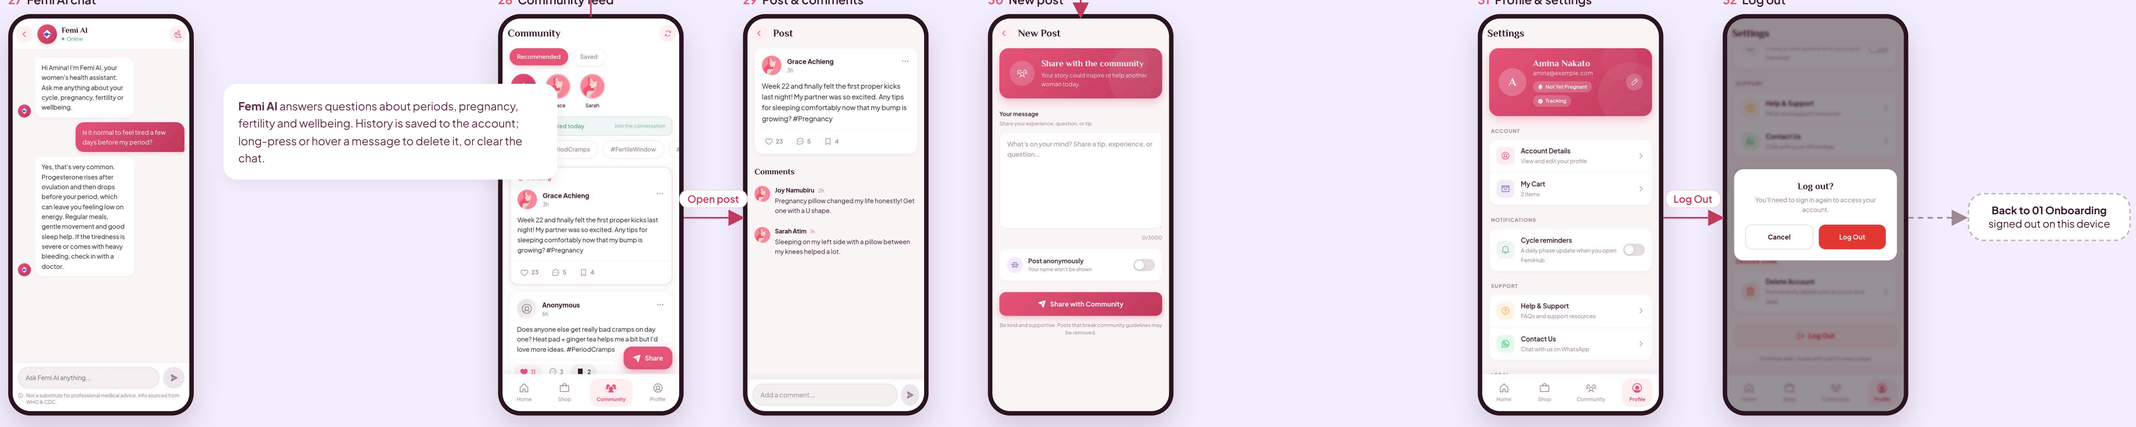

FEMI AI · COMMUNITY · PROFILE

From Home → AI Chatbot

Community tab

Profile tab

Session & flow rules

Reopening the app
Signed-in users go straight to 07 Home. No new sign-in.

Stage decides the tracker
Not Yet Pregnant / A Mother → Period tracker. Pregnant → Pregnancy tracker. Users change stage in Profile → Account details.

Shopping before sign-up
Visitors can browse the shop. Add to Cart saves the item, sends them to sign up, and adds it to their cart once they're in.

Sign-in links
The link opens 05 on the same device. On another device, the user confirms their email. The email may land in spam.

Payments
MTN / Airtel Money in UGX, M-Pesa in KES. Prices can be viewed in UGX, KES or USD. The order is saved only after the payment is confirmed.

Same account as the mobile app
Profile, cycle and pregnancy data, cart, community and chat history stay in sync between the web app and the FemiHub mobile app.
